

AXION retrofit solutions for Ford trucks

Interface for Ford Trucks F-Max to connect rear view or front cameras

Radio not included

Ford Trucks F-Max with 7.2 inch multimedia display

For vehicles equipped with the 7.2 inch multimedia display, our interface CA-FT01 can be used to connect cameras. There is a connection for a rear camera and a front camera, for which then one interface each is needed.

The camera image is displayed in full screen.

CA-FT01

Interface for connecting one* AXION camera (PAL) to the Ford 7.2 inch multimedia display

*When connecting two cameras 2x CA-FT01 are necessary

Camera examples for different applications

Surface-mounted cameras:

Shutter cameras:

Intelligent turn assistants for commercial vehicles

The ICA „Turn-Assist“ systems monitor the blind spot and inform/warn the driver as soon as a dangerous situation arises, e.g. due to cyclists, pedestrians, etc. in this area.

Your advantages:

- reliable detection through object classification
- compact components for fast and flexible installation
- compliance with the latest BMDV recommendation (Verkehrsblatt issue 08/2022)
- multi-level information / warning strategy according to UN-ECE R151

ICA Turn-Assist Al40

Artificial intelligence in the camera for precise detection and object classification

ICA Turn-Assist XR45

Intelligent 77GHz dual radar for highest precision and reliability in all weather conditions

Accessory examples for system expansion:

WCC 11

Spiral cable set for a rear view camera.
7-pin connectors and sockets.
Non-interchangeable due to special coding.

PB-1

Priority circuit for tractor and trailer with one camera each. The control box automatically detects the hitching of a trailer and its camera is given priority. (Plug & Play).

CRV 7105 M

7" (17.8 cm) rear view monitor with two camera inputs.
Easy plug & play connection.
Suitable for 12 V & 24 V use.
